

# Corona Quilt 2020

- 1) Go through your stash (no purchasing new fabric if at all possible!) and choose a color scheme. Find 2 fat quarters (or equivalent amount) of a light value, 2 of a medium value, and 2 darks. Also choose a background: white or "creams". That's it to start. More to come next week.

## 2) first construction step

- make 6 four patches that will finish at 4 x 4 (4-1/2 x 4-1/2 raw). Make 3 of them using light with medium, and 3 of them using light with dark. I am attaching my favorite method for making small numbers of four patches--learned at a long ago seminar from Billie Lauder. Click here [four patch-two from two copy](#) for those directions.

## 3) 2nd construction step

- a) Cut 4 strips to set aside for sashing. Each should be 2-1/2" wide by 20-1/2" long. They can all be cut from the same fabric, or cut 2 each of two of your fabrics. Use your medium or darks.
- b) Make 2 nine patches that will finish at 6 inches (6-1/2 raw). Use **one** of your dark fabrics and **one** of your lights. Make both of them "light" nine patches, in other words the outer 4 corners and the center square light fabric.
- c) Make 4 half square triangles that will finish at 6" square (6-1/2 raw). Use your background fabric (cream or white) for the light half and one or both of your medium fabrics for the other half.

## 4) 3rd construction step

- Make 3 friendship stars that will finish at 6" square (6-1/2 raw). If possible make the center square of the same fabric(s) that you used for the darker part of the half square triangles in step 3c. Make the corners of each of the blocks from your light(s), and the half square triangles from a dark and the light which would match the corner squares.

- Cut two 6-1/2 in squares of your background fabric and set them aside.

## 5) Final construction step

- 6) Layout
