

## Layering Order for Accuquilt Machine

1. Choose the correct size of silver metal tray.
2. Choose your die.
3. Find the plastic sheet that most closely matches the size of your chosen die.
4. Make a “sandwich” in this order on the metal tray.

**BOTTOM** layer 1: die with foam side facing UP

**MIDDLE** Layer 2: your fabric covering the blade outline

**TOP:** layer 3: the matching plastic sheet

5. Slide the sandwich to make contact with the roller, at a diagonal if possible.
6. Turn the crank in the direction you want the sandwich to move.
7. Continue turning the handle until the entire die has exited from under the roller.
